DETAILED ACTION

Status of the Application

- [1]** Claims 1, 7-9, 11, and 21-22 are pending in the application.
- [2]** Applicant's amendment to the claims, filed on 11/9/07, is acknowledged. This listing of the claims replaces all prior versions and listings of the claims.
- [3]** Applicant's arguments filed on 8/16/07 and 11/9/07 in response to the Office communications mailed on 7/26/07 and 10/22/07, respectively, have been fully considered and are deemed to be persuasive to overcome all outstanding rejections and/or objections as previously applied.

Claim Rejections - 35 USC § 112, First Paragraph

- [4]** The written description and scope of enablement rejections of claims 1, 7-9, and 21-22 under 35 U.S.C. 112, first paragraph, are withdrawn in view of the instant claim amendment to limit the polypeptide of claims 1, 7, and 21 to being "non-crystalline".

In analyzing the specification's descriptive support for the limitation of "non-crystalline", it is noted that according to MPEP 2173.05(i), "Any negative limitation or exclusionary proviso must have basis in the original disclosure. If alternative elements are positively recited in the specification, they may be explicitly excluded in the claims. See *In re Johnson*, 558 F.2d 1008, 1019, 194 USPQ 187, 196 (CCPA 1977)". See also the Court's holding in *Ex parte Parks*, 30 USPQ2d 1234 (Bd. Pat. App. & Int. 1993), "[i]n rejecting a claim under the first paragraph of 35 U.S.C. 112 for lack of adequate descriptive support, it is incumbent upon the examiner to establish that the originally-

Art Unit: 1656

filed disclosure would not have reasonably conveyed to one having ordinary skill in the art that an appellant had possession of the now claimed subject matter. *Wang Laboratories, Inc. v. Toshiba Corp.*, 993 F.2d 858, 26 USPQ2d 1767 (Fed.Cir. 1993). Adequate description under the first paragraph of 35 U.S.C. 112 does not require *literal* support for the claimed invention. *In re Herschler*, 591 F.2d 693, 200 USPQ 711 (CCPA 1979); *In re Edwards*, 568 F.2d 1349, 196 USPQ 465 (CCPA 1978; *In re Wertheim*, 541 F.2d 257, 191 USPQ 90 (CCPA 1976). Rather, it is sufficient if the originally-filed disclosure would have conveyed to one having ordinary skill in the art that an appellant had possession of the concept of what is claimed. *In re Anderson*, 471 F.2d 1237, 176 USPQ 331 (CCPA 1973)."

In this case, while there does not appear to be *in haec verba* support for the limitation of "non-crystalline" in the specification, it is noted that the specification throughout positively recites "crystal" or "crystalline" polypeptides as encompassed by the claims and further, the specification throughout contemplates the polypeptides encompassed by the claims in a non-crystalline form, *i.e.*, in solution. As such, it is the examiner's position that the limitation of "non-crystalline" finds adequate descriptive support in the original application as filed.

Ex Parte Quayle

[5] This application is in condition for allowance except for the following formal matters:

Art Unit: 1656

[a] The use of the trademark "American Type Culture Collection" has been noted in this application at p. 17, line 27 of the substitute specification filed on 12/14/05. It should be capitalized wherever it appears and be accompanied by the generic terminology.

Although the use of trademarks is permissible in patent applications, the proprietary nature of the marks should be respected and every effort made to prevent their use in any manner which might adversely affect their validity as trademarks.

[b] This application contains sequence disclosures that are encompassed by the definitions for nucleotide and/or amino acid sequences set forth in 37 CFR 1.821(a)(1) and (a)(2). However, this application fails to comply with the requirements of 37 CFR 1.821 through 1.825; applicants' attention is directed to the final rulemaking notice published at 55 FR 18230 (May 1, 1990), and 1114 OG 29 (May 15, 1990). To be in compliance, applicants should identify nucleotide sequences of at least 10 nucleotides and amino acid sequences of at least 4 amino acids in the specification by a proper sequence identifier, i.e., "SEQ ID NO:" (see MPEP 2422.01). If these sequences have not been listed in the computer readable form and paper copy of the sequence listing, applicant must provide an initial computer readable form (CRF) copy of the "Sequence Listing", an initial paper copy of the "Sequence Listing", as well as an amendment directing its entry into the specification, and a statement that the content of the paper and CRF copies are the same and, where applicable, include no new matter as required by 37 C.F.R. 1.821(e) or 1.821(f) or 1.821(g) or 1.821(b) or 1.825(d). See particularly the amino acid sequence G-S-H-M as disclosed at p. 18, line 22 of the substitute specification filed on 12/14/05.
